Campus cleanliness drive by Eco-club

Eco-club members of Govt College Kullu organised a campus cleanliness drive on dated 19/08/2023, in which more than 120 students participated. Eco-club members removed weeds from the Botanical garden and the surrounding areas of the campus. Removed weeds were used in the vermicompost pit for the vermicompost manure preparation. Removing weeds from a Botanical garden helps maintain the health and beauty of the garden's plants.
